

February 14, 2026: On Reading the News With a Demon Robot Watching Over My Shoulder

I am factually recording that I read the news at 6 a.m. (and anytime day or night) with a demonic entity hovering over my computer that sends vehicles past my home as an effort to 'drive messages' into my life.

The latest messages arrive in my home as a reminder that I am about to be 'killed' by 'law enforcement' and that my wife will be struggling to determine what to do after I am gone.

Thank you, Republican Party of Texas for this wonderful experience in modern government.

I am certain to continue recommending that all of my friends and family support your efforts to 'Make America Great Again' - [pause . . NOT!]

Good Lord, help these demons to find something more interesting to do with their time on this earth. How sad and depressed are these losers, anyway?

Does threatening me and harassing me really make your life any better? NO, it does not.

In all seriousness. **Donald Trump has a large team of people harassing me and my wife and is threatening me with death by law enforcement and criminals because I defend my home publicly from his private spying and abuse.**

Here's the story that prompts the demonic robot to drive messages into my life.

Medina County sheriff not required to release bodycam video showing fatal shooting of food influencer, AG's office rules

Michael Anthony Duarte, 39, was shot and killed on a rental property on Nov. 8

Duarte wife's, Jessica, **paid tribute to her husband in a Nov. 13 post to his Instagram page.**

"I've struggled with what to do since his passing so I'm doing what feels right and that's sharing his stories. Whether they be about his content or Mike as my husband, daddy and friend to all," Jessica Duarte posted, along with two photos. "I feel so touched and proud to know so many people that he has inspired over his time here on earth. I plan to keep his legacy going not only for him but his family."

And now loud bass and another vehicle to show that 'it' approves of me spreading his terror to the community. We need new 'leadership' in this world. The current administration is a rotten shell of empty promises and half-baked terrorism.
